

## FILM AND TELEVISION INSTITUTE OF INDIA

Visual Effects (VFX) & Animation has become inseparable part of visual media like films, television, internet etc. Media like advertising, educational programs, entertainment, documentaries, children's films, science research program requires visual effects and animation to make it more interesting, informative and effective. This requires aesthetic skills, visual sense & know-how of software to handle high-end equipment and software.

The course will help candidates to know the workflow of creating visual effects and required preproduction for the same. The course will open opportunities for the candidates who are willing to join visual effects industry and also, for aspiring independent film makers, to understand the techniques and tools to create effective VFX in limited infrastructure and time frame. Participants will also get instructions and tricks from industry expert(s) for creating Visual effects.

Candidates will be able to explore various tools and techniques for creating basic visual effects in film/ TV, along with an overview of process of digital effects and will have an understanding of the film effects history, compositing and VFX.

The unique feature of this course is practical experience of Pre-production, Production and Post production. Candidate will get an opportunity to develop his/her own idea for VFX, participate in Chroma shoot and do the post production towards end of the course.
